RADIOMAR has an exceptional experience in the Marine Electronics Market, where he has worked since 1974. All the dedication and commitment over all these years, gotten the satisfaction of our customers and the recognition by the, Classification Society RINA-Brazil, which issued our first ISO9001 certificate in Jan/2005, with the last renewal in Sep/2018. Our engineers and technicians are willing to plan, monitor and perform the installation service of the products we represent.

Our Technical Support Team is able to perform repairs on board all types of vessels and in any brand of equipments we represent.

We offer training courses for our dealers and customers, allowing them to operate and maintain the equipment and systems sold or installed on board of their vessels.

Recently with the advent of the supply and installation of a complex VSAT Communication Systems with remote CCTV access (Typical example: **MULTSAT - ANNEX V** Systems required by Petrobras to be installed in all Support Vessels contracted), it became necessary to improve support to our customers, so we offer Preventive and Maintenance Contracts, with guaranteed performance. We perform the monitoring of the systems, either by remote access, either by technical assistance on board.

Summarizing, RADIOMAR is able to offer:

- Surveys
- Systems Integration Projects
- Services of Installation and Commissioning of Equipment and Systems
- Repair and Maintenance Services on Board
- Laboratory for Equipment Repairs
- Preventive Maintenance Contracts
- Training
